Overview

This presentation explores how a mobile app can significantly **enhance the shopping experience** at malls by providing essential navigation and services.

OBJECTIVES

- Simplify indoor navigation
- Manage parking availability
- Facilitate food court orders

GOALS

- Improve visitor satisfaction
- Reduce wait times
- Optimize parking usage

Project Process

CONCEPT PHASE

Defining core features
for mall visitors' needs

DESIGN PHASE

Creating user-friendly
interface and
experience for app

TESTING PHASE

Conducting trials to
refine functionality and
enhancements

LAUNCH PHASE

Official release of app
to enhance mall
experience

Tools & Technologies Used

Java Script

V S Code
